Software Web Developer

I'm a self-learned Software Developer who can help your company to make more progress and achievements by translating your vision and business ideas into real web applications.

I mainly work on Web Development with React JS & Node.js, with good knowledge of other JS frameworks ex: Angular, and Next.js, with an interest in other programming languages ex: Java.

CORE PROFICIENCIES

ReactJS – Angular – Next.js – Javascript – Typescript – REDUX – React Query.
Node.js – Express – MongoDB – Git version control – Docker (In Progress).
HTML – CSS – SASS – Bootstrap - Material UI – Ant Design.

WORK EXPERIENCE

- **Frontend Developer at Servicekee (Egypt, Cairo – On-Site)**   *Aug 2022*
  - o Debugging and fixing technical issues.
  - o Translating business ideas in a real web application.
  - o Creating and building new web pages and pushing code to the production.
  - o Integrating the Frontend pages and Components with the Backend APIs.
  - o Attending meetings and collaborating with other teammates tasks.
  - o Using several technologies to work there like React JS, next.js, and Material UI.
- **Frontend Developer at Block Gemini (Emirates, Dubai – Remotely)**   *Dec 2021*

  - o Using several technologies like JavaScript, React JS, Angular, Sass, and more.
- **Frontend Developer at Phantom Technologies (Egypt, Cairo – On-Site)**   *May 2021*
  - o Discussing the UI with the designer to choose the best UI for the applications.
  - o Translating UI designs into real web applications.
  - o Building several web pages from scratch using React JS, REDUX, Sass and more.
  - o Contributing to several applications there such as EVE, AURA, and AURA PREME.

PROJECTS / LIVE PRODUCTIONS

- **Passboard (Company: Servicekee – Live: https://passboard.net)**
  - o Passboard is a Software web application that helps the users to well discover the events around him, create his own events, and manage them in one platform.
  - o I was working on that application in several cycles, mainly working on the create event and manage-events cycles, updating pages UIs based on a revamped designed UI, and major mission of integrating with Backend APIs.
  - o I also created some pages from scratch like passboard-hits page.
  - o Skills I used: Next.js, React JS, REDUX, JavaScript, CSS, Material UI, and more.
- **Welnes (Company: Welnes App - Live: https://welnes.app)**
  - o Welnes is an application that provide users with the guides and ideas that make their life more healthy, contacting with nutrition specialist, posting their updates in stories or posts to the application wall and even follow and get the news of others.
  - o I was working on building the landing page of this application and translating the business features to a real-world application based on a well-designed UI.
  - o Skills I used: Next.js, JavaScript, SASS, Firebase, and more.
- **Wallex (Company: Block Gemini – Live: https://wallex.asia)**
  - o Wallex is a Software web application for international payment solutions with smart experience, customized, and low-coast payment solutions for users growing businesses.
  - o I was working on adding some functionalities that serve the business ideas behind the application, adding some UI updates, and responsible for fixing bugs.
  - o Skills I used: Angular, JavaScript, CSS, Bootstrap, and more.

EDUCATION

- **Studied at faculty of Computers and Artificial Intelligence, BSU.   2018 - 2023**
- **Bachelor of Computers and Artificial Intelligence, CS, Beni-Swief University.   2023**
